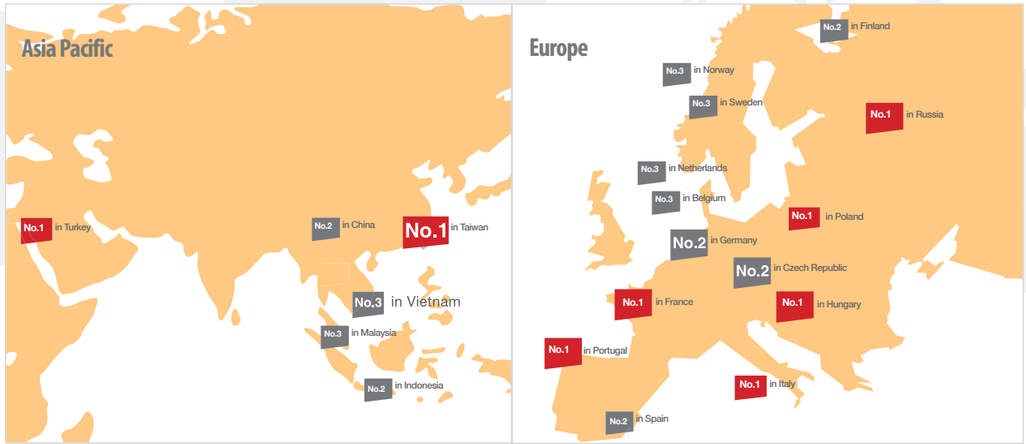
ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (2011), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- **The Top 1 notebook brand in Central and Eastern Europe**
- **The Top 2 notebook brand in South East Asia**
- **The Top 2 notebook brand in China**
- **The Top 3 notebook brand in Western Europe**



ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989
- One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard

The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS' notebooks have the best quality and are reliable.

ASUS received 4,168 awards in 2012

A testament to your commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organisations and IT journalists worldwide.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The World's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS is No.1 in Quality and Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

Survey of 30,000 Laptops Lists ASUS as Top in Reliability Rankings

SquareTrade, the largest independent warranty service provider in the United States, published a report that analyzed the failure rates of over 30,000 new laptop computers manufactured by the leading nine notebook brands over the past 3 years. A minimum of 1,000 notebooks from each brand were sampled.

With three year malfunction rates under 16%, laptops from ASUS are nearly 40% more reliable than HP, the worst performer in this study. HP, the industry leader, which shipped nearly 16 million laptops in the past year according to IDC, ranked dead last in this reliability study with over one-fourth of laptops expected to malfunction in three years. Gateway and Acer, the no. 2 maker of laptops, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (pg 6).

Square Trade, 2009/Nov/16th, Report"1 in 3 laptops fail over 3 years"

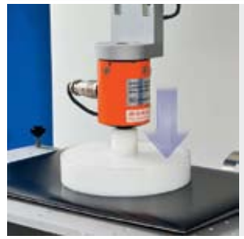
SquareTrade Report Disclaimer

- As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under $400 to define the netbook category in this analysis
- Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data
- We did not take into consideration purchase locations
- The document and all of its contents are provides as-is. SquareTrade has made efforts to ensure that the data and conclusions we present are correct, but makes no warranty, express or implied about the data accuracy of the data

ASUS Quality Tests Ensure Top Quality Notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

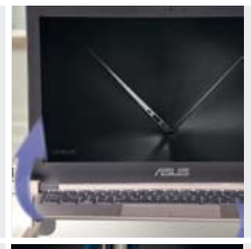
Keyboard Test
ASUS tests the keyboard to check the comfort and durability, especially on keys that are more frequently used.



Pressure Test
Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests, and ASUS commercial panel pressure tests exceeds the requirements of normal notebook standards by 20%.

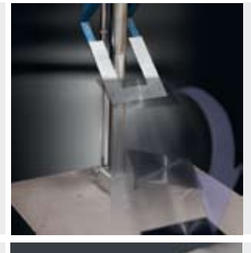
Hinge Test
Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness. ASUS Commercial Series notebooks exceed industry standards in this area as well.

Shock Test
Notebooks are likely to experience shocks during shipping and day-to-day use. This is why ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.



Spin Test
Most of the notebook covers can be opened with one hand and this means that the screen has to be flexible. Spin tests are carried out to measure how well the lid is able to protect the notebook by testing it with a twist on the overall framework to an extreme degree.

Vibration Test
Vibration test puts the notebooks on multiple frequency vibrations to ensure that the frame construction outside and the inside of the notebooks are always attached securely.



Fall Test
A dropped notebook shouldn't mean a broken notebook and ASUS puts its notebooks through a series of drop tests to measure how well they cope with life's little accidents. ASUS commercial notebooks surpass industry standards at more than double the drop height.

Temperature Test
An environment of high humidity and low is stimulated, and also in extreme temperature conditions. Each weak point in the material and framework is strengthened. This is the reason ASUS notebooks have high durability.

Port Test
Each port is tested to ensure that it remains strong and solid despite the continuous plug and unplug actions.

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

Zero defects during 600 days in space!
Two ASUS notebooks were selected by R&K, a major computer and electronics supplier to the aerospace industry, to provide astronauts with dependable computing hardware.

"ASUS notebooks never overheat like those made by other companies", said Sergei Avdeev, one of the Russian cosmonauts. "Thermal flow in space and on Earth is completely different. Only notebooks with the best cooling can survive continious operation. We used our ASUS notebooks all day without a problem."

In the air

Helping the NRMA CareFlight helicopter rescue unit save lives.
NRMA CareFlight, an emergency medical and rescue helicopter unit serving New South Wales in Australia, uses ASUS notebooks in different fields, including aviation, medical treatment, and adminstration. ASUS notebooks play a critical role in CareFlight improving survival rates in severe head trauma incidents. They help medical teams arrive on-site faster than ambulances, with fatalities lowered by 33%.

"All out pilots are very impressed with ASUS notebooks and amazed at their ability to withstand aircraft vibration," said Mark Lees, Community Relations Manager of CareFlight. "We are ready to install ASUS notebooks in all our aircrafts and link them to onboard navigation computers."

On the road

Flawless performance during grueling off-road racing.
ASUS notebooks performed critical tasks at the PATAGONIA 2000 race, which saw them used in hote deserts and snow-covered mountains. They acted as navigation devices, exceling due to their built-in GPS functionality and dynamic map displays. They were also mobile communication centers, enabling email and video conferencing.

"Needless to say, ASUS computers survived the severe conditions of this strenuous voyage without a single flaw," said race organiser Aviv Shweky.

At the ends of the earth

Conquering Antarctica.
Perfect performance records in freezing temperatures at the South Pole have been achieved. A December 2003 expedition that included acclaimed mountaineers Shi Wang and Jian Liu set out to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet, where temperatures drop below -100°F. Wang and Liu brought ASUS S200N notebooks to record and share their experiences.

On the world's highest peak

First notebooks to scale Mount Everest.
Conditions at the world's tallest mountain may faze other notebooks, but several ASUS models, including the U5/S6 leather and bamboo editions, W7 and U1 were chosen to accompany an expedition to the top of Mount Everest, know locally as Qomolangma. Upon reaching base camp at 500m, only ASUS notebooks continued to operate. Other notebooks failed to boot due to extremely low ambient temperatures. The U5 even made it to the peak at a height of 8848m, with expedition leader Captain Wang Yongfong carrying it as a tribute to eco-friendly technology and making ASUS the world's first notebooks at the top of Mount Everest.

ASUS Customer Happiness 2.0

ASUS Customer Happiness 2.0 is dedicated to enriching every aspect of all your experiences.

asus design

Sleek and light trendsetting design
•
Gorgeous wide-angle IPS display quality*

Enjoy SonicMaster impactful and richer audio performance
•
AudioWizard provides multiple modes for diverse listening

ASUS received 4,168 awards in 2012

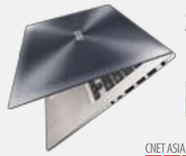
A testament to our commitment to innovation, design and quality, ASUS garnered a total of 4,168 awards from prestigious technology organisations and IT journalists worldwide.

Innovation International CES Awards

Six ASUS products have been selected for the CES 2012 Innovations Design and Engineering Awards honoree program. The awards have become a hallmark for the best-designed products in consumer technology and our brand promise of Inspiring Innovation • Persistent Perfection has resulted in such wide recognition for our products.

iF Design Awards

ASUS products have won numerous international industrial design awards and have once again demonstrated their outstanding design quality and innovation by taking home no less than 10 accolades at the iF Design Awards 2012.



ZENBOOK™

It's really sexy, very robust, and it's an Ultrabook.
- HARDWAREZONE.COM, 2012 JAN 17

CNET ASIA
The Asus Zenbook UX31E is an excellent-looking Windows Ultrabook laptop that matches the MacBook Air step for step with an even better price.
- CNET ASIA, 2012 Feb 06

The Asus Zenbook UX31E is an excellent-looking Windows Ultrabook laptop that matches the MacBook Air step for step with an even better price.
- CNET ASIA, 2012 Feb 21

Just 3mm at its thinnest and 17mm at its thickest, its 1600 by 900 pixel 13-3inch screen puts even the MacBook Air to shame.
- Digital life, 2012 Feb 21/29

STUFF MAG
All-metal design, a hi-res 13.3in screen and dual-core Corei7 innards: ASUS' Ultrabook has brains and beauty.
-STUFF MAG, 2012 APR 06

We feel that the differentiating factor for an Ultrabook should be battery life, which is where ASUS outlasts everyone else.
-Hardware MAG, 2012 NOV 01

VIVOBOOK S400

DIGITAL LIFE
An affordable laptop for users who want a WIndows 8 touchscreen machine that does not break the bank.
- DIGITAL LIFE, 2012 NOV 23

N46VZ

CNET ASIA
With its upgraded internals, the Asus N46VZ continues to be an excellent multimedia laptop, even if a slow HDD and bloatware drags down its performance.
- CNET ASIA, 2012 MAY 22

TRANSFORMER PAD TF300

With Tegra 3 based devices becoming more commonplace, does that make the Transformer Prime old and unappealing? Far from it. In fact, it's still very much the fantastic Android device that first appeared in our labs late last year.
- HARDWAREZONE.COM, 2012 APR 25

CNET ASIA
You're unlikely to find a more affordable quad-core powered 10-inch Android tablet than the Asus Transformer Pad 300.
- CNET ASIA, 2012 APR 22

TRANSFORMER PAD INFINITY TF700

STUFF TEST WINNER
A pin-sharp HD screen, quad-core power and battery-boosting dock make this the top Droid.
-STUFF, 2012 OCT 01

NEXUS 7

There is little reason to doubt that we are looking at the best Android tablet on the market right now. At US$199 (8GB) and US$249 (16GB), the Nexus 7 is also priced to move. In the Android space at least, none of the immediate competition can match its performance, features and overall value proposition. Google (and by extension, ASUS) have a winner on their hands.
- HARDWARE MAG, 2012 OCT 22

DIGITAL LIFE
Smooth controls and a speedy processor make this a great tablet for music and videos.
- CNET ASIA, 2012 OCT 03

STUFF TEST WINNER
This little Android is head and shoulders above the 7in tablet competition.
- STUFF, 2012 OCT 01

EDITOR'S CHOICE
Cream of the Crop
- HARDWAREZONE.COM 2012 AUG 18

Despite its lower than average price point, the Nexus 7 boasts quite a solid build that is comparable to the more expensive 7-inch tablets such as the BlackBerry PlayBook.
- HARDWAREZONE.COM 2012 AUG 18

PadFone

CNET ASIA
The PadFone is a great idea and features a fantastic battery life when combined with its accessories.
- CNET ASIA, 2012 APR 21

The ASUS PadFone is one of the most versatile mobile device we've seen to-date.
- HARDWARE ZONE, 2012 MAY 14

PadFone 2

CNET ASIA
We love the concept of the smartphone-tablet hybrid, and we think it's great that Asus has improved on many aspects of it.
- CNET ASIA, 2012 NOV 14

Sporting the latest mobile processor, a 4.7-inch display with one of the best panel technologies, superb imaging performance and a solid design, the ASUS PadFone 2 is ready to fight with the big guys in the market.
- HARDWARE ZONE, 2012 NOV 14

DIGITAL LIFE
The Asus PadFone 2 may not break new ground in the mobile device market, but its speed puts others to shame.
-DIGITAL LIFE, 2012 NOV 14

ASUS TAICHI™

The Incredible Fusion of Notebook and Tablet

Combining a Notebook and a Tablet

The ASUS TAICHI™ is an incredible combination of notebook and tablet whose double-sided Full HD IPS display switches seamlessly between modes at a touch. Lid open, TAICHI™ is a notebook with a full-size backlit keyboard. Lid is closed, TAICHI™ instantly transforms into a multi-touch tablet. Both TAICHI™ screens work independently and simultaneously too, so people can share its powerful Intel® Core™ i7 processor, astonishing SonicMaster audio co-developed with Bang & Olufsen ICEpower®, dual HD camera and array microphones.

Windows 8 | Touch Screen | 1080P Full HD | 2-SEC INSTANT ON | USB 3.0 | Bluetooth 4.0 | micro HDMI | Quick Charge | SonicMaster

ENHANCED PRODUCTIVITY

One-Finger Mode Switching

Want to switch from your laptop mode to tablet mode? Just use one finger to close the lid of TAICHI. Instantly it transforms from a laptop into a tablet interface. It's that simple.

TAICHI Stylus

Use TAICHI Stylus to sketch or to write notes in Tablet or Extend mode. Expand the scope of work achievable with ASUS TAICHI and its Stylus. Now you can enhance your productivity regardless of the nature of tasks with TAICHI.

TAICHI™ SHARING : 4 Display Modes

It's a notebook. It's a tablet. More than that, the unique function of TAICHI which enables you to switch to 4 different display modes gives you the unparalleled flexibility of sharing with your boss, colleagues to friends and family, giving you your desired privacy with the 4 different modes.

INCREDIBLE BEAUTY

Dual High-Definition Display Screens

The ASUS TAICHI™ gives a spectacular high-definition view with apps, games and movies thanks to two 1080p Full HD displays. IPS technology ensures a brillant image with accurate colours and crisp contrast, while the 178° wide viewing angle keeps each screen crystal-clear even when seen from the side. TAICHI can capture incredible images too, thanks to HD camera in both notebook and tablet modes.

Thin and Light

Even with two screens, ASUS TAICHI is able to maintain its sleekness with a front profile of 3mm and rear profile of 16.5mm. Besides that, the 1.25kg light weight adds to the ease of mobility.

Lift the lid with one smooth motion and TAICHI becomes a fully featured notebook. The Full HD 11.6" screen features IPS technology for a vibrant image with wide viewing angles. The backlit keyboard with ambient light control and large multi-touch touchpad make light of productivity tasks too.

NOTEBOOK MODE

TABLET MODE

Close the lof and TAICHI instantly becomes a tablet. 10-point multi-touch Full HD screen gives complete fingertip control and the supplied stylus works just like a pen on paper for accurate handwritten notes and sketches, plus IPS technology keeps the iamge bright and clear. Built-in motion sensors also make TAICHI the ideal for mobile gaming.

Only TAICHI gives you 2 display screens with its Mirror mode. With the lid open and Mirror mode enabled, the 2 screens are able to display the same image which makes TAICHI perfect for sharing your favourite movie or software demonstration. IPS display technology ensures a bright, vibrant image with wide viewing angles on both screens too.

MIRROR MODE

EXTEND MODE

In Extend mode, TAICHI is no longer one computer - it's two. When enabled, the 2 screens can be used by 2 people at once, as a notebook as well as a tablet. Extend mode is ideal for presentations and the supplied Screen Share app lets the presenter see the script on one screen while the audience views the slides on the other.

TAICHI Exterior Interface

Use TAICHI as a tablet with the lid closed, or utilize TAICHI's Mirror or Extend modes for sharing your content.

TAICHI Interior Interface

Use TAICHI as a fully featured notebook with the lid opened.

INCREDIBLE AUDIO & VISUAL

5MP 1080p Exterior Camera

With 5MP exterior camera and HD interior camera, now you can take premium quality photos with TAICHI, as well as have high quality visuals during video conferences.

Premium Audio Quality
Co-Developed with Bang & Olufsen ICEpower®

TAICHI features ASUS SonicMaster audio technology, developed with the world-renowned Bang & Olufsen ICEpower®. SonicMaster takes sound quality to a whole new level, with a wider frequency range for clearer vocals and resonating bass.

High Quality Conferences with background noise suppression

Array microphones with positional audio detection and background noise suppression ensure spoken communication is always loud and clear, too.

ASUS INTUITIVE DESIGN

Backlit Keyboard

In dim light, the keyboard is highlighted with a back light, which enhances your productivity even with an absence of light.

Large Gesture Pad

The large Smart Gesture touchpad makes apps in notebook mode just as intuitive to use.

The World at Your Fingertips

Inspired by the Lation verb for "to live", ASUS VivoBook is a personal companion that blends the unique elegance of ASUS notebook design with Windows 8 touch-friendly operating system.

ASUS VivoBook embodies the spirit of touch to maximize intuitive interaction, offering naturally enjoyable user experiences that enhance ever aspect of your lifestyle. It has been designed with stand-out aesthetics, true-to-life sound and instinctive touch.

They are ideal for the increasingly cloud-based nature of computing, supporting seamless connectivity and usage on the go.

VivoBook S200

Windows 8 · Touch Screen · 2-SEC INSTANT ON · USB 3.0 · Bluetooth 4.0 · micro HDMI · Quick Charge · Larger Smart Gesture Touchpad · SonicMaster

ASUS INTUITIVE DESIGN

6mm Small Touch Points

All-Glass Touchscreen. Intuitive Small Touch Points of 6mm.

ASUS VivoBook S400 ushers in completely new touch experiences with its all-glass panel. Smooth throughout, the responsive touchscreen means your fingers can slide edge to edge naturally and unhindered. This flowing motion makes swiping, scrolling, and all other gestures quicker, more intuitive, and incredibly rewarding. With small touch points of 6mm, what it means is even the small fingers of toddlers are able to operate the ASUS VivoBook touchscreen laptops smoothly.

ASUS Intuitive Instant Functions

ASUS has developed a range of Instant Functions especially for Windows 8, enabling fuller immersion in the new operating system. With just one key press, engage and load up Instant Functions for more customization options and more personal interaction with your computing environment. The interface design puts you first, so it's utterly user friendly, offering quick settings and direct access to your content. You can change the way your ASUS VivoBook works and feels in seconds!
